

伺服複數台車自動供料系統 Servo Multi Trolleys Automatic Feeding System

伺服複數台車自動供料系統

Servo Multi Trolleys Automatic Feeding System

- 輸送方式：利用伺服馬達搭配雙軸線性滑軌搬送，提供精準且穩定的搬送定位，且同一台車可一次性搬送多量的產品。
- 適用產線：適用於單機多工位生產設備之連結，如bobbin製程，空心線圈製程。
- **Conveying type:** based on servo motor combined with twin-axes linear slide moving, provides precise and stable moving positioning, and in same one trolley capable of moving much more quantity of products one time.
- **Applicable production line:** suitable for linking production equipment which is single unit with multi working axes, such as bobbin manufacturing process, air coil manufacturing process.
